

 A white Brother AIRFLOW 3000 overlocker sewing machine is shown on a light-colored wooden surface. The machine has four thread spools on top and a large white dust cover on the right side. To the left of the machine are two spools of blue thread, a pair of scissors, and a pink chalk. In the background, there is a window with white curtains and green foliage outside. The machine has the 'brother' logo on the front and 'AIRFLOW 3000' on the dust cover.

AIRFLOW 3000

AIRFLOW 3000 JET-AIR THREADING TECHNOLOGY THREADING IS A BREEZE

- **Jet Air Threading Technology**

Thread the AIRFLOW 3000 with a blast of jet air. With threading ports that are connected to the end of each looper by tubes, at the press of a button, the air sends the thread through the looper. So, it's like a breath of fresh air to change thread colors.

- **Excellent Stitch Quality**

Excellent for fine knits and stretchy materials, which can be very challenging fabrics for a traditional sewing machine. Achieve outstanding finishing touches with flatlock, overlock, and rolled hem stitches on most specialty fabrics.

- **Quick Change Levers**

The AIRFLOW 3000 has pair of quick-change levers for the rolled hemstitch feature, and a switch that will activate and deactivate the cutting knife before the edge is wrapped with thread (overlocked).

- **Fast and Quiet**

The fast speeds of 1,300 stitches per minute make the AIRFLOW 3000 efficient. With the moderate noise level, you can add decorative touches and professional finishes to any DIY project, anywhere, anytime.

- **Differential Feed**

The Differential Feed Ratio (0.7mm to 2.0mm) provides outstanding stitch quality and acts as the tool for custom lettuce edge finishes on specialty materials.

- **Brightly Lit Work Area**

The AIRFLOW 3000 has plenty of high-quality LED lighting that is easy on the eyes when sewing on dark fabrics.

- **Included Accessories**
