USB Connectivity

320mm x 240mm embroidery area

The large embroidery area allows you to tackle larger designs and create stunning projects like quilt blocks, wall hangings, jacket backs, table mats and more.

Utilise the embroidery area with the 2 sets of hoops provided, including a 90mm round, 120mm round, 170mm round and 320mm x 240mm hoop. Each hoop is marked with a number in cohesion with the machine's unique hoop numbering system which prevents you from stitching a design that is outside the permitted embroidery area.

7" Colour Touch Screen

The advanced 7" LCD colour touch screen is extremely easy to use with high brightness, simple navigation and fantastic features. Use the real-time stitch simulator to track your designs on-screen and preview your embroidery stitch out process.

Design colour selection and sequencing are simple with the customisable thread colour palette and with 36 built-in scalable fonts, plus the ability to draw on-screen, there's so much potential for creating unique projects!
